## PROFESSIONAL SUMMARY

I am a professional with a background in IT project coordination and business analysis, supporting the implementation, development and integration of complex information systems. My experience covers business needs analysis, requirements definition, solution specification and project execution coordination.

**My strength is connecting business logic with technology, ensuring clear requirements and structured implementation.** With a practical developer mindset and hands-on understanding of systems engineering, I effectively collaborate with development teams and external vendors. I always align technical delivery with business needs, ensuring usable, value-adding outcomes.

My work is driven by systems thinking, consistency, disciplined execution and a strong sense of responsibility.

## KEY ACHIEVEMENTS

- **Infor CloudSuite Automotive ERP implementation – RÁBA Automotive Holding Plc. (automotive industry, 200+ users)**  
As a member of the central ERP project team, I led the coordination of the Oracle → Infor data migration and managed the **complete testing and stabilization of the EDI integration** (VDA, EDIFACT, customer-specific Trading Partner Packages). **Electronic data interchange connections with multiple automotive OEM partners were successfully established.** Go-live: April 2024.
- **GINOP 5.1.9 – Regional Project Manager (KVA foundation - Western Transdanubia, budget: HUF 600M)**  
Led the full implementation of the program from planning to closure: **development of project structure and operational procedures, partner coordination (5-member core team + 4 organizations × 2 staff + 20 subcontractors), and creation of a digital administration system ([www.3000000.hu](http://www.3000000.hu)).** Result: successful launch of 958 new enterprises.
- **IT infrastructure audit and development concept – (Lajtamag Ltd.)**  
Performed a full-scope IT audit across 3 sites, including on-site assessments and stakeholder interviews. Delivered a 110+ page infrastructure and system inventory (server park, network, security, licensing, operations), along with a modernization **concept featuring prioritized actions, cost estimates and a roadmap for consolidation and stabilization of the IT environment.**

## CORE COMPETENCIES

- **IT Project Management:** project planning, scheduling, risk management, status reporting
- **ERP Systems:** Infor CloudSuite Automotive (LN)
- **Business Analysis:** requirements management, process mapping, specifications, documentation
- **Integration:** data migration, EDI (VDA, EDIFACT), interface coordination
- **Agile Delivery:** Jira, iterative development support, backlog prioritization
- **Stakeholder Management:** IT–business alignment, vendor management
- **Technical Background:** software development (C++, Python), data processing logic

## TECHNICAL SKILLS

- **ERP & Integration:** Infor CloudSuite Automotive (LN), Oracle ERP, Infor Automotive Exchange (EDI), OFTP2
- **Data & Interfaces:** SQL (MySQL, MS SQL), data migration, JSON
- **Development Fundamentals:** C++, Python (automation, tooling), REST API basics
- **System Administration:** Windows Server, Linux (Debian), Active Directory basics, Hyper-V
- **Tools & Methods:** Jira, specifications and use case documentation, advanced MS Excel

## WORK EXPERIENCE

<b>06/02/2023 - present</b>	<b>RÁBA Automotive Holding Plc.</b>	<b>IT Project Coordinator</b>
<ul style="list-style-type: none"><li>• Coordination of Oracle → Infor ERP data migration from preparation to go-live (data verification, consistency checks, migration error handling)</li><li>• Stabilization and validation of EDI integration with 20+ automotive customers (OFTP2, VDA, EDIFACT)</li><li>• Go-live support (02/04/2024) – coordination of go-live across multiple business areas: procurement, logistics, sales, finance, technology, production planning, manufacturing, quality assurance</li><li>• Collection and coordination of development requirements with business areas; structuring requirements and clarifying scope</li><li>• Preparation of documentation and specifications</li><li>• Handling support events and change requests: prioritization, coordination, status follow-up with multiple external developers</li><li>• Leading project status reporting and management decision support</li></ul>
